Maximum capacity. Minimum downtime. Nordberg LT Mobile Crushing Plants.

www.metso minerals.com

Metso Minerals leads the world in mobile plants for quarrying and in-pit crushing applications. We provide you with the most proven mobile crushing concept and the best know how.

The highly flexible, track-mounted Nordberg LT series offers you a cost-efficient and flexible solution. Together with our LL Series conveyors, it builds up a complete mobile crushing and conveying system.

For example, the Nordberg LT160 (picture) is the biggest and most powerful fully mobile primary crushing plant built to date. It is a serious contender for any large in-pit crushing application – aggregate, cement or mining. Nordberg LT160 has an extremely impressive reliability record: even in the most demanding conditions it keeps going. And going. And going...

Contact us to hear more about our mobile crushing solutions that will improve your profitability.

Nordberg LT110
